40%

Average energy savings

UES helps clubs plan, build, and upgrade facilities, reduce running costs, and improve sustainability. We deliver practical improvements that strengthen performance and create better environments.

Energy Saving Solutions

Reduce energy costs through a joined-up approach to efficiency, from HVAC upgrades and LED lighting to on-site renewables such as solar PV. We help deliver long-term savings and a lower carbon impact.

Irrigation

Keep your outfield in top condition with efficient irrigation upgrades that save water, improve coverage, and reduce manual maintenance, helping grounds teams maintain consistent playing surfaces.

HVAC

Create comfortable, efficient spaces with modern heating and cooling systems designed to improve performance, reduce energy use, and keep your facilities running smoothly all year round.

Construction & Fit-Out

From new-build facilities to high-quality refurbishments, we deliver future-proof construction and fit-out solutions that create better buildings for players, staff, and visitors.
